Vancouver, BC V6S 1P2

Dear Cameron (and family)

I want to thank you and all your family who have so generously assisted our projects in Tanzania. The sustainable projects the Jones Family Foundation have supported will continue to inspire changes for individuals and families for many years.

The student residence, (that not only did you fully fund but also provided invaluable advice during the design and construction stages) continues to provide comfortable and safe accommodation for over 300 young women every year as they study at Saint Francis College. Prior to your generous gift the university had no onsite residences, and young women were forced to find private accommodation in sometimes questionable private homes and were walking home at night through the dark city streets.

The benefit does not stop with the accommodation
The young women pay a reasonable annual residence fee and Provision receives 40% of this annual fee each year and we use this cash flow to support eight full time oral health workers who teach oral health to the community, again a long term much needed benefit to the whole community because of the Jones family foundation.

The long term sustainability makes the benefit of your investment immensely impactful over many years. Thank you on behalf of the people of Tanzania

Kenneth A Morrison CPA President
